

PAB Coventry Ltd Environmental Policy

At PAB we recognise that our activities and services impact upon the environment, and we strive to control and reduce this impact. We are committed to complying with all applicable environmental legislation.

We will seek to prevent pollution and bring about continuous improvement on our environmental performance through setting and meeting objectives and targets. In particular we will:

- Reduce the impact of our office and manufacturing operations by becoming more efficient in our use of energy and resources. Environmental factors will also be taken into account when new equipment is purchased.
- Seek to dispose of wastes and engage in recycling according to the best environmental option and in line with legislation.
- Maintain a dialogue with key customers and suppliers to ensure our company's position on environmental policy is fully understood.

A full programme of awareness training for staff will be carried out to ensure that every employee understands the company's environmental policy commitments and plays a role in meeting them.
